

1002 DP

Semi-Automatic Clipping Machine

1002DP with printer

The **1002DP** semi-automatic machine is so simple to operate that even an unskilled worker can easily close up to 30 bags per minute. The clip is applied with the bag insertion in the machine. By removing the ready package, the next clip automatically takes its place for the next bag.

The 1002DP has a printer for values, dates, or codes on the clip.

Used for:

- Bakery products
- Sweets
- Dry fruits, snacks
- As well as anything that can simply be closed in a bag.
