

1003

Semi-Automatic Bag Closing Machine

1003

The semi-automatic **1003** machine is so simple to operate that even an unskilled worker can easily close up to 30 bags a minute. It closes the bag with your products inside and prints at the same time. It has low purchase costs and few moving parts, resulting in small maintenance needs and long-term use of the machine without any problems.

Available in three models:

- **Model A**
- **Model P**
- **BP model**

Model A uses the RJ series clip. P & PB models use the RLS series clip with built-in small paper label for better print quality.

Model P includes a common seal printer (Trodat®) to allow printing of logos, etc. The BP model includes a band printer for values, dates, or codes on the clip.

Used for:

- Bakery products
- Sweets
- Dry fruits, snacks
- As well as anything that can simply be closed in a bag.
