

Detectable Consumables

Consumable Materials Detectable by Metal Detectors and Visible on X-ray Inspection Systems

The food, beverage and pharmaceutical industries need to prevent/ reduce the risk of contamination by foreign bodies.

The safest way to protect against and eliminate the risk of contamination by consumables is to use such products that are detectable by metal detectors and visible on X-rays at all stages of production.

Kapelis Packaging, in partnership with Detectamet, can now supply detectable consumables, including:

- Disposable or multi-purpose gloves
- Mob Caps, Shoe Covers, Beard Snoods, etc. personal protective clothing
- Earplugs
- Masks
- Pens, markers, etc. stationery items
- Many more detectable products
