

Filling Line 6000

Automatic Filling and Capping Lines

Filling Line 6000

Filling Line 6000 is a complete line for packaging liquids in preformed containers (bottles, jars etc.) made of plastic or glass, with a capacity of up to 10 liters (upon request).

The machine sequentially:

- Disinfects the container.
- Fills with product.
- Mounts and screws the lid/cap.
- Adds labels (upon request).

Suitable for packing milk, yoghurt, oil, cream, mayonnaise, honey, jam, etc. as well as non-food/drinkable products such as chemicals, liquid soap, detergents, machine oil etc.

All parts of the machine that come into direct contact with the product are made of anti-corrosive stainless steel.

General Features:

- 100% stainless, robust construction.
- Bottle and lid sterilization system.
- Conveyor belts.
- Cap screwing system.
- Accessories from leading manufacturers (Festo, SMC, Omron, Bender, Schneider Electric etc.).
- Electronic circuit console with high quality components, in accordance with European Union directives for 24V connections.
- European construction.

Optional:

- Forming unit for PET containers.
- Foam avoidance system.
- Labeler.
- Ink jet printer.
- Sleeve unit.
- CIP cleaning system.
- Corridor cleaning system.
- Automatic container feed system.
- Ultra-Clean version:
 - Sterile air supply into the chamber through HEPA-14 filters.
 - Sterilization of the lids by UV radiation.
 - Hydrogen Peroxide Disinfection System.
 - Pressurized bottling chamber.

Filling Line 6000

Kinematical speed (pcs/min)	100
Min dose (lt)	0,1
Max dose (lt)	1,4 (10 upon order)
Max container height (mm)	160 - 280
Max container diameter (mm)	54 - 95
Lid diameter (mm)	30 - 49
Air consumption (lt/min)	80
Electrical supply (V)	380
