

KP4255 / KP4770

One-Step Shrinking Machines

KP 4255

General Features:

- Ease of use.
- Strong seals.
- Ability to create only a folder (disabling shrinkage).
- Adjustable:
 - sealing time.
 - sealing temperature.
 - shrinkage duration.
- The electromagnet keeps the lid closed when shrinking. Automatic opening.
- Powerful heat swirl fan (2 fans in the larger model).
- Adjustable product height.
- Film perforation during machine operation.
- The machine is always delivered with a support that has wheels for easy movement.
- Compliance with EC regulations of the European Union.

	KP4255	KP4770
Cutting/sealing chamber dimension (Width x Length, mm)	540 x 390	690 x 440
Max product dimensions (Width x Length x Height, mm)	500 x 380 x 180	650 x 420 x 180
Max film roll width (mm)	500	550
Max film roll diameter (mm)	250	250
Electrical supply (V)	220	220
Power (kW)	3,5	4,5
Productivity (pcs/min)	6 - 8	6 - 8
Machine dimensions (Width x Length x Height, mm)	125 x 85 x 75	155 x 90 x 75
Machine weight (kg)	105	115
