MINI MAYA Vertical packaging machine

Robust and compact packaging machine, realized in vertical or inclined version to reduce breakages or damages for fragile and/or delicate products.

Available in varnished or stainless steel AISI 304, it grants the respect of hygiene standards as well as packaging quality. Its particularly small dimensions allow to satisfy the packaging needs also of limited artisanal productions.

The off-the-rack pneumatic reel-holder, the wide 7" color touch screen, the rapid change of the forming tube and high quality components are only some of the features making it a point of reference among the Entry-level machines.

Capacity up to 45 bpm

Very compact dimensions

Reel-holder shaft with pneumatic expansion

Technical Data

Max mechanical speed	Up to 45 bpm
Pillow bag's max width	270 mm / 10,63"
Bag's max length	240 mm / 9,44" (480 mm / 18,89" with double pull)
Reel's max width	560 mm / 22,04"
Reel's max external Ø	300 mm / 11,81"
Reel's internal Ø	76,2 mm / 3"
Max forming tube's Ø	170 mm / 6,69"
Packaging materials	Polypropylene, laminates, polyethylene, barrier films, net films
Vertical sealing	Pneumatic
Horizontal sealing	Pneumatic
Recipes	10 (expandable)
Interface	7" color touch screen
Electrical supply	380 V, three-phase + N + G
Compressed air	6 bar
Compressed air pipe	8 mm / 0,31"
Compressed air consumption	430 l/min.
Installed power	3 kW
Structure's material	Stainless Steel
Weight	300 kg

Options

- Square bottom device
- Exit conveyor
- Printer
- Gas injection

Main bag formats

- Pillow
- Flat bottom

Special versions

- Inclined bagger for fragile products
