

Pastpack L

Automatic Linear Sealing Machine for Cups and Trays

PASTPACK L

Pastpack L is an automatic linear sealing machine. Sealing is done with aluminum foil or roll of film, depending on the order.

Linear configuration allows the placement of many fillers (for filling of composite products) as well as additional packaging options.

Suitable for sealing applications of trays or cups for packaging of: yoghurt, cream, oil, sauce, mayonnaise, mustard, salads and other thin or viscous liquids, even with pieces up to 10 mm.

Also, with a linear weigher, it is suitable for packing nuts, croutons, crackers and other dry products.

General Features:

- 100% stainless, robust construction.
- UV lamp for sterilization.
- One-way conveying system.
- Automatic feeding of cups.
- Accessories from leading manufacturers (Festo, SMC, Omron, Bender, Schneider Electric etc.).
- Control panel with 7.2-inch color touch screen (LG, Siemens, Allen-Bradley).
- Date printer.
- Electronic circuit console with high quality components, in accordance with European Union directives for 24V connections.
- European manufacturing and CE.

On Request:

- Servo version: because of the servomotor, higher speeds, smoother and more precise movements are achieved, longer machine life span.
- Exit conveyor.
- Lid magazine.
- Range of additional fillers e.g., suitable for extremely viscous liquids.

Pastpack L	Regular	Servo
Kinematical speed (pcs/min)	25	35
Max round cup diameter (mm)	130	190
Max rectangle tray dimensions (mm)	148 x 210	
Max container height (mm)	120	
Electrical supply (V)	220/380 (depends on operations)	
Air supply (bar)	6	
Air consumption (lt/min)	300 – 400 (depends on operations)	
Power (kW)	0,5 – 1,5 (depends on operations)
