

Pastpack R

Automatic Rotary Sealing Machine for Cups and Trays

PASTPACK R

Pastpack R is a high-speed rotary automatic tray sealing machine for small containers, usually cups. Sealing is done with aluminum foil or roll of film, depending on order.

It has a rotating table with a variety of stations. This arrangement achieves increased speed while taking up little space.

Suitable for sealing applications of usually round cups, of relatively small diameter, for packaging of: yoghurt, cream, oil, sauce, mayonnaise, mustard, salad and other thin or viscous liquids, even with pieces up to 10 mm.

Also, with linear weighing, they are suitable for packing nuts, croutons, crackers, and other dry products.

General Features:

- 100% stainless, robust construction.
- Anti-corrosive materials suitable for dairy products.
- 29-liter feed hopper.
- Accessories from leading manufacturers (Festo, SMC, Omron, Bender, Schneider Electric etc.).
- Control panel with 7.2-inch color touch screen (LG, Siemens, Allen-Bradley).
- Ability to add additional features such as extra fillers, lids etc.
- Printer.
- Electronic circuit console with high quality components, in accordance with European Union directives for 24V connections.
- European manufacturing and CE.

On Request:

- Servo version: due to the servo motor, higher speeds, smoother and more precise movements are achieved, a longer life span of the machine.
- Cups/Lid Magazine.
- UV lamp for sterilization.
- Extra special adjustments.
- Available additional fillers e.g., for extremely viscous liquids.

Pastpack R	Regular	Servo
Kinematical speed (pcs/min)	33	40
Max round cup diameter (mm)	110	130
Max rectangle tray dimensions (mm)	126 x 90	142 x 92
Max container height (mm)	120	120
Electrical supply (V)	220	220
Air supply (bar)	6	6
Air consumption (lt/min)	350	450
Power (kW)	2,2	3,5
