

# Solid Ink Coding Sealer

**FRBM-810II**

The **FRBM-810II** model is a tabletop vertical band sealer. Pre-made bags are sealed standing up, which is ideal for powder, liquid or solid products that would spill if sealed lying flat. The sealing unit can be adjusted in height to suit different sizes of packages. The FRBM-810II is equipped with PTFE seal belts and can adjust the temperature from 0 to 300°C. Equipped with solid ink coding system to achieve different color and content coding requirement.

## Solid Ink Coding Sealer

<b>Voltage (V/Hz)</b>	AC 220/50 110/60
<b>Motor Power (W)</b>	50
<b>Sealing Power (W)</b>	300×2
<b>Printing Heating Power (W)</b>	40×2
<b>Speed (m/min)</b>	0-12 (0-16)
<b>Sealing Width (mm)</b>	10
<b>Temperature Range (°C)</b>	0-300
<b>Printing Type</b>	Solid-Ink Roller
<b>Distance from Sealing Center to Conveyor Table (mm)</b>	20-40/200-320
<b>Conveyor Table Size (Length × Width, mm)</b>	954×153
<b>Max. Conveyor Loading for Single Package (kg)</b>	≤1
<b>Overall Conveyor Loading (kg)</b>	≤3
<b>External Dimensions (Length × Width × Height, mm)</b>	950×420×315 (Horizontal) 955×345×625 (Vertical)
<b>Net Weight (kg)</b>	37.5
