

# Vacuum Chambers for Automatic Shrink-Vacuum Lines

Vacuum Machines with Automatic Product Transport

**TITAN-X 950 A**

Models available:

- **TITAN-F 1000 A**
- **TITAN-X 950 A**

Series of single and double chamber vacuum machines for vacuum / heat shrinking lines. They bare an **INTRALOX** conveyor belt, which is automatically activated and transfers the products to a shrink dip tank or shrink tunnel.

## General Features:

- Stainless steel construction, suitable for food contact.
- Reliable **BUSCH** vacuum pumps.
- High pressure double sealing for safety.
- High pressure metal cap with automatic opening.
- Detection of boiling point so that no fluids of the product can evaporate.
- Pneumatically driven **INTRALOX** automatic belt conveyor.

## Optional:

- Stronger vacuum pumps (see brackets in the specification table on the left).
- Modified atmosphere packaging (**MAP**).
- Smooth air return before opening (softair).
- Cutting/sealing bar.
- Supervision window on the lid.
- Motorized lid movement.
- Special cabin/cover dimensions.
- External control panel arm on the side or at the rear of the machine.
