

Volumetric AUGER Fillers

Volumetric AUGER Fillers

AUGER dosing systems are designed for dosing powder products. Their function is stepwise and volumetric. The speed and travel of the screw are adjusted by means of its own display or through the PLC of the machine to which it is attached. They are also available in servo version.

General Features:

- Mixer
- Dosing screw
- Driving motor
- Control system
- Frame with hopper

Optional:

- Powder suction system

Volumetric AUGER Fillers

Kinematical speed (cycles/min)	60/ 120 with servo
Dose range (l)	0,01 - 2
Length (mm)	940/ 1150 with servo
Width (mm)	820
Height (mm)	1100/ 1300 with servo
Weight (kg)	180/ 200 with servo
Electrical supply (V)	380, 3-phase, 50Hz
Power (kW)	2,3/ 3 with servodrive
