

# **Dri-Fresh®** **Resolve®**

Absorbent pads for fruit

- **Soft & spongy protection, reducing sweating and bruising to the fruit while maintaining great product presentation**
- **Certified to EU compostability standard EN-13432**
- **Choice of colours available**
- **Any size, shape or configuration**

**Dri-Fresh® Resolve®** provides an exceptional absorbent presentation surface for fruit whilst ensuring the fruit is allowed to breathe.

This is achieved through its specially developed microporous surface allowing air to circulate whilst absorbing excess juices into its cellulosic absorbent membrane.

This layer also provides cushioning which reduces sweating and bruising, providing the ultimate absorbent pad for fruit.

**Dri-Fresh® Resolve®** is fully compostable, is available in a variety of colours, and is available in any size, shape of configuration, including slit rolls.
