

# **Dri-Fresh<sup>®</sup>** **Sea-Fresh<sup>™</sup>**

Absorbent pads/liners for fish transportation

- **Effective absorbency**
- **Enhances appearance**
- **Optimises the sale price of fish**
- **Reduces odour**
- **Locks in moisture**
- **Custom sizes available**
- **Range of absorbencies offered**

**Dri-Fresh® Sea-Fresh™** absorbent liners are designed to quickly and effectively absorb the melting ice and juices released during fish transportation. The liquid is absorbed and trapped inside the liner to prevent spillage and reduce odour. The transport crate remains cold, clean and dry to optimise the condition and appearance of the fish.

**Dri-Fresh® Sea-Fresh™** absorbent liners can be custom designed to your application, and can be made large enough - at 680mm x 360mm - to fit in the standard 25 kilo trays used for fish such as salmon, as well as many other sizes.

**AS AN ALTERNATIVE, PLEASE ALSO SEE OUR ALTERNATIVE LINERS FOR SEAFOOD, DRI-FRESH® SEA-FRESH™ SP**

**Highly effective absorbency for clean, safe and efficient fish transportation**

**Enhances the appearance & optimises the sale price of the fish**
