

# ONVAC 400P

## Semi-Professional Tabletop External Vacuum Packaging Machine

Kapelis Packaging S.A. offers the OnVac series of tabletop external vacuum machines, which are a practical, easy to use and economical solution for vacuum packaging, with a variety of basic functions, offering different sealing lengths and widths depending on the dimensions of the selected bag and the product to be packaged.

The machine models we offer have all been designed for and exhibit exceptional quality and durability, as they are able to withstand the rigors of constant use in compatible applications. Depending on each individual machine model, they are compatible with normal vacuum bags and embossed/grid bags, while their simple control schemes and layouts make them extremely easy to use.

Due to the pre-installed special components and operating procedure, the **ONVAC 400P** model is compatible both with embossed/grid vacuum bags and normal/regular vacuum bags.

Technical Specifications	ONVAC 400P
Sealing length (mm)	400
Sealing width (mm)	8
Maximum attainable vacuum point (mbar)	200
Sealing time (sec)	1 - 13
Electrical supply (V/Hz)	220/50
Power (W)	240
Machine dimensions (Length x Width x Height, mm)	480 x 220 x 95
Machine weight (kg)	3,96
